

Swisscanto Flex Collective Foundation

FLEX 20

Mixed Portfolio | Reinvesting | June 2023 | Swiss edition

Description

The actively managed investment pool invests in bonds, equities, real estate, and gold. The assets are primarily invested in Swisscanto funds and units in investment foundations. The investment pool is invested fairly conservatively. It pursues an investment strategy aimed at achieving a high regular income. The equities portion averages 28%, the bond portion around 42%, the real estate portion around 25% and the portion gold around 3%. This allocation helps to diversify risk and increase potential income. The BVV2 investment guidelines apply.

Profile / Suitability

Only the investment of assets of tax-exempt occupational pension vehicles in Switzerland is permitted (pillar 2). Investment involves risks, especially with regard to fluctuations in value and return. Furthermore, investments in foreign currencies are subject to exchange rate fluctuations.

Sustainability approaches in use

All details published here are for your information only and do not constitute any investment advice or other recommendation. We have carefully researched and compiled the content. Nevertheless, Swisscanto cannot guarantee the accuracy, completeness or currency of the information provided.

Important note for Switzerland: The sole binding basis for participation is the participation agreement. The rules and annual reports are available free of charge from the Swisscanto Flex Collective Foundation of the Cantonal Banks, Office, P.O. Box, 8152 Glattbrugg or www.swisscanto-flex.ch.

Explanations regarding sustainability approaches

Voting Engagement

As a shareholder and lender, an active and continuous dialogue is maintained with the corporate management. Companies are urged to set ambitious CO₂e reduction targets, implement them consistently and provide transparent reporting in this context. Voting rights are exercised in accordance with our voting guidelines, which are based on Swiss and international corporate governance rules and the United Nations Principles for Responsible Investment (UN PRI). In the case of equity investments, voting behaviour is published transparently on www.swisscanto.com/voting.

Swisscanto Blacklist

Blacklist exclusions predominantly of manufacturers of prohibited weapons (cluster bombs and cluster munitions, anti-personnel and landmines, biological and chemical weapons, nuclear weapons, systems or material*, enriched uranium* as well as blinding laser weapons and incendiary weapons). In the evaluation, we primarily rely on Swiss legislation and agreements that have been ratified by Switzerland and are recognised internationally. In general, our evaluation is also consistent with the recommendations for exclusion made by SVVK-ASIR. *Only in the case of proliferation contrary to the Non-Proliferation Treaty (NPT).

Further exclusions

Application of further exclusion criteria, in addition to the Swisscanto blacklist, to reduce ESG risks and with the aim of not investing in securities with ESG-critical business models. The exclusion criteria apply to companies associated with the extraction of coal (>5% revenue)*, coal reserves (excluding metal production)*, production of weapons and ammunition, manufacture of military hardware (>5% revenue), production of pornography, child labour and/or UN Global Compact violations (excluding Green and Sustainability bonds, if applicable). In the event of potential violations by companies of the UN Global Compact Principles (United Nations standard on human and labour rights, environmental standards and anti-corruption) resulting from our screening, we seek dialogue as part of our engagement and urge companies to change their behaviour. If no change in behaviour occurs within a reasonable period of time, existing investments will be sold. In addition to the exclusion criteria for business activities, we also maintain an exclusion list for states. When preparing this exclusion list, we primarily take into account socio-economic risk dimensions such as money laundering and corruption. *Green and Sustainability bonds excluded

Systematic ESG-integration

The systematic analysis of ESG criteria forms an integral component of the active investment process, with the aim of identifying risks and opportunities based on ESG trends at an early stage. ESG criteria supplement the pure financial analysis and lead to more informed investment decisions

Paris Agreement

In accordance with the Paris climate target, the investment activity of the portfolio is aimed at reducing the CO₂e intensity of the investments by at least 4% percent per year. The investment strategy target is based on the CO₂e intensity of the investment universe at the end of 2019.

Sustainability approaches

For the corresponding portfolio illustrated sustainability approaches apply to all invested assets or a substantial part of it. Individual criteria may be implemented differently for the various invested investment products and asset categories. Detailed information on Swisscanto investment funds and assets of the Swisscanto investment foundation can be found in the corresponding prospectus, fund agreement and investment guidelines respectively.

CO₂e

CO₂ equivalents (CO₂e) are a measure to standardise the climate impact of the greenhouse gases carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O) and fluorinated greenhouse gases (CFCs). All of these gases remain in the atmosphere for different lengths of time and do not contribute equally to the greenhouse effect.

ESG

ESG stands for the aspects of environment (E), social (S) and governance (G).

SVVK-ASIR

The Swiss Association for Responsible Investments (SVVK) is an association of institutional investors and was founded in 2015. The association provides services to its members so that they can focus their investment decisions on the environment, society and the economy.
