

Swisscanto Flex Collective Foundation

FLEX 25

Mixed Portfolio | Reinvesting | September 2025 | Marketing material

Description

The portfolio is actively managed and invested globally, with a rather defensively positioned investment profile. The assets are primarily invested in collective investment schemes of Swisscanto and investment groups of Swisscanto investment foundations. The strategic asset allocation is as follows: 2% liquidity, 49% bonds, 25% equities, and 24% real estate. Tactical investments in gold are also permitted. BVV2 investment guidelines apply.

Profile / Suitability

Only the investment of assets of tax-exempt occupational pension vehicles in Switzerland is permitted (2. pillar).

Explanations on sustainability approaches

Stewardship: Voting & engagement

Stewardship encompasses voting (exercising voting rights at annual general meetings) and engagement (conducting active dialogue on sustainability issues) at companies in which investments are made. With the Swisscanto funds we practice voting and engagement, while with direct investments we only practice engagement. In doing so we aim to promote sustainable business strategies and practices, compliance with recognised international principles, and best practice standards on sustainability issues.

Avoidance of controversies

Exclusion criteria are designed to avoid investments in business activities and practices that are particularly contrary to sustainability principles. We pay special attention to avoiding investments in controversial and conventional weapons, thermal coal as well as investments that violate the principles of the UN Global Compact (such as human rights, labour standards, the environment and tackling corruption).

ESG integration

ESG integration refers to systematic inclusion of ESG criteria (environmental, social and good corporate governance) in the investment process. Here, we systematically incorporate corresponding financially relevant ESG risks and opportunities, of companies and countries, for example, into our analyses.

Climate: CO₂e reduction

CO₂e reduction refers to the reduction of greenhouse gas emissions (such as carbon dioxide and methane) in the investment context. Here, we are guided by a CO₂e benchmark (especially for passive investment strategies) or by the targets set out in the Paris Climate Agreement. This agreement aims to limit global warming to well below 2 degrees Celsius compared to pre-industrial times, aiming to achieve a maximum temperature rise of 1.5 degrees Celsius.

Further information

Further, supplementary product-specific explanations regarding the sustainability approaches applied can be found in the relevant legal documents at products.swisscanto.com

Sustainability approaches

The sustainability approaches presented are applied to a majority of the investments within the present asset management portfolio. This primarily applies to the implementation of actively managed investments in traditional asset categories with investment products from the Swisscanto brand. Accordingly, the sustainability approaches are not implemented for all assets. There are additional exceptions to the application of sustainability approaches within the investment products used.

CO₂e

CO₂e equivalents (CO₂e) are a measure to standardise the climate impact of the greenhouse gases carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O) and fluorinated greenhouse gases (CFCs). All of these gases remain in the atmosphere for different lengths of time and do not contribute equally to the greenhouse effect.

ESG

ESG stands for the aspects of environment (E), social (S) and governance (G).

MSCI® ESG

Although Zürcher Kantonalbank's information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information (the "Information") from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/ or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose.
